DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis (US 4395996).

Davis discloses a fuel container 10 having a chamber and a heating device 45 attached to the container with a bracket and heat conductive body for heating the fuel in the container, and a switch attached to the container and couple to the heater to prevent overheating, the container having a port with a cap to open and close the port.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of White (US 3956934).

Art Unit: 3742

Davis discloses the claimed invention except the fuel gauge tube. White discloses a fluid container having a gauge tube for displaying the fluid level in the container.

It would have been obvious to one of ordinary skill in the art at the time the invention was made, in view of White, to modify the device of Davis to include a gauge tube to indicate the fuel left in the container.

Allowable Subject Matter

Claims 5-11, and 14-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
